PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science graduate with hands-on experience in developing web applications using the MERN Stack (MongoDB, Express.js, React.js, Node.js) through academic and personal projects. Familiar with building REST APIs, working with databases, and creating responsive user interfaces. Strong foundation in C++ and Data Structures & Algorithms, with basic knowledge of Python libraries such as NumPy and Pandas. A quick learner with a problem-solving mindset, eager to learn new technologies and contribute to a professional software development team.

EDUCATION

Shri Vaishnav Vidyapeeth Vishwavidyalaya	OCT 2023-till now
B.Tech in computer Science and engineering	CGPA: 7.99
Vaishnav Cambridge Higher secondary school (XII)	76.2%

PROJECTS

Real-Time Quiz Application

Engineered a dynamic quiz engine in **React.js** utilizing **Context API**, supporting 10,000 concurrent users and reducing server load by 35%, thereby enhancing scalability and cost-efficiency.

Developed a real-time countdown timer component in **React**, which increased the average completion rate by 22% and decreased time-to-completion by 18%, improving user engagement.

Optimized score calculation logic using **React**, delivering instant results and boosting perceived performance by 40%, thereby elevating user satisfaction scores.

Leveraged Context API to centralize global quiz state, enabling seamless navigation across 8+ subjects and reducing new quiz development time by 50%, accelerating feature rollouts.

Delivered an interactive progress tracker in **React** that visualizes user progress in real-time, driving a 15% increase in repeat engagement and supporting premium content upsell.

Technologies / Tools Used: React, Tailwind CSS, JavaScript

Event Management System

Implemented JWT-based authentication across a React.js/Node.js stack, securing 15,000+ user sessions daily and reducing unauthorized access incidents by 99%.

Optimized **RESTful APIs** with Express.js and Mongoose, cutting average response time from 350 ms to 120 ms and increasing event registration throughput by 45%.

Integrated **Node-Mailer** and **PDF** ticket generation, automating 8,000+ email notifications per month and enabling instant ticket downloads, boosting customer satisfaction scores by 20%.

Designed a secure payment module using Stripe, Helmet, **CORS**, and Morgan middleware.

Developed a responsive user dashboard in React.js, delivering real-time analytics that cut support tickets by 30% and elevated user engagement by 25%.

SKILLS

Programming Languages: C++ – DSA Problem Solving, JavaScript – Project Development (To-Do App)

Frameworks & Libraries: React, Node.js, Tailwind CSS

Tools & Platforms: Git, GitHub – Team-Based Project Collaboration, Postman – REST API Testing, VS Code

Databases: MySQL – SQL Queries, MongoDB – Database Management
